

2-way cartridge valves, directional functions

Type LC (cartridge valves),
type LFA (control cover)

RE 21010

Edition: 2014-09

Replaces: 03.05

- ▶ Size 16 ... 160
- ▶ Component series 2X; 6X; 7X
- ▶ Maximum operating pressure 420 bar
- ▶ Maximum flow 25 000 l/min

Features

- ▶ Valve poppet with or without damping nose
- ▶ 2 area ratios
- ▶ 4 different springs
- ▶ 4 stroke limitations
- ▶ Control cover with installed seat valve
- ▶ Control cover with installed shuttle valve
- ▶ Control cover for mounting directional spool valves with or without installed shuttle valve
- ▶ Higher pressure ranges, upon request

Function, sections, symbol

2-way cartridge valves are elements that have been designed for a compact block design. The power section with ports A and B is installed into the manifold in a receiving hole standardized according to ISO 7368 and closed with a cover. In most cases, the cover is simultaneously the connection from the control side of the power section to the pilot control valves. By controlling with the relevant pilot control valves, the power section can take over the pressure, directional and throttle function or a combination of these functions. Particularly economical solutions are achieved by adapting the nominal size to the different levels of flow of the individual ways of an actuator. One extremely economical method is to transfer multiple functions on the power section of an element.

2-way cartridge valves consist mainly of a control cover (1) and an installation kit (2). The control cover contains the control bores and stroke limitation, hydraulically controlled directional seat valve or a shuttle valve depending on the overall function required. Electrically operated directional spool valves or directional seat valves can also be mounted on the control cover. The installation kit consists of a socket (3), ring (4) (only up to size 32), valve poppet (5), optionally with damping nose (6) or without damping nose (7), and closing spring (8).

2-way cartridge valves work depending on the pressure. This results in three pressurized areas **A₁**, **A₂**, **A₃**, which are important for the function. The area on the valve seat **A₁** is regarded as 100%. The annulus area **A₂** resulting from the gradation is 7% or 50% of the area **A₁** depending on the version. The area ratio **A₁ : A₂** is therefore either 14.3 : 1 or 2 : 1. The **A₃** area is equal to the sum of areas **A₁ + A₂**. Due to the different area ratios **A₁ : A₂** and the resulting different annulus areas (**A₂**), area **A₃** is 107% or 150% of area **A₁** regarded as 100% on the seat.

The following applies:

Areas **A₁** and **A₂** act in the opening direction. Area **A₃** and the spring act in closing direction. The direction of action of the resulting force from opening and closing forces determines the spool position of the 2-way cartridge valve. The 2-way cartridge valves can be flown through from A to B or from B to A. When the area **A₃** is pressurized by removing pilot oil from channel B or external pilot oil supply, channel A is blocked leak-tight.

Installation bore and connection dimensions according to ISO 7368¹⁾
 (dimensions in mm)

$$\begin{aligned}\sqrt{x} &= \sqrt{Rz1\max \cdot 4} \\ \sqrt{y} &= \sqrt{Rz1\max \cdot 8} \\ \sqrt{z} &= \sqrt{0,0025 \cdot / Pt\max \cdot 16}\end{aligned}$$

Size 160, dimensions and item explanations, see page 5.

¹⁾ Except for size 125 and 160

²⁾ Maximum dimension

- 1 Depth of fit
- 2 Control dimension
- 3 If the diameter for port B is a different one than ØD3 or (ØD3*), the distance from the cover contact surface to the center of the bore must be calculated.
- 4 Port B may be positioned around the central axis of port A. However, it must be ensured that the mounting bores and the control bores are not damaged.
- 5 Bore for locating pin
- 6 80 mm only with control cover for directional valve set-up size 16 (axis X-Y bores)
- 7 For Ø ≤ 45 mm → fit H8 is admissible

Technical data

(For applications outside these parameters, please consult us!)

Ambient temperature range		°C	-30 ... +60 (NBR seals) -20 ... +60 (FKM seals)									
MTTF _d values according to EN ISO 13849	Years	150 (for further details see data sheet 08012)										

Hydraulic											
Maximum operating pressure	► Without directional valve	bar	420								
	► Port A, B, X, Z1, Z2	bar	315; 350 and 420 (depending on the mounted directional valve)								
	► Port Y	bar	depending on the maximum tank pressure of the mounted directional valve								
	► With monitored spool position	bar	400								
Maximum flow		l/min	25,000 (size-dependent; see characteristic curves page 10 and 9)								
Hydraulic fluid			see table below								
Hydraulic fluid temperature range		°C	-30 ... +80 (NBR seals) -20 ... +80 (FKM seals)								
Viscosity range		mm ² /s	2.8 ... 500								
Maximum permissible degree of contamination of the hydraulic fluid, cleanliness class according to ISO 4406 (c)			Class 20/18/15 ¹⁾								

Hydraulic fluid	Classification	Suitable sealing materials	Standards
Mineral oils	HL, HLP, HLPD, HVLP, HVLPD	NBR, FKM	DIN 51524
Bio-degradable	- insoluble in water	HETG HEES	ISO 15380
	- soluble in water	HEPG	
Flame-resistant	- water-free	HFDU, HFDR	ISO 12922
	- containing water	HFC (Fuchs Hydrotherm 46M, Petrofer Ultra Safe 620)	
		NBR	ISO 12922

Important Information on hydraulic fluids:

- For more information and data on the use of other hydraulic fluids, please refer to data sheet 90220 or contact us!
- There may be limitations regarding the technical valve data (temperature, pressure range, life cycle, maintenance intervals, etc.)!
- The flash point of the hydraulic fluid used must be 40 K higher than the maximum solenoid surface temperature.

Flame-resistant – contains water:

- Maximum pressure differential on the seat: 50 bar
- Pressure pre-loading at the tank port > 20% of the pressure differential, otherwise increased cavitation
- Life cycle as compared to operation with mineral oil HL, HLP 50 to 100%

¹⁾ The cleanliness classes stated for the components need to be maintained in hydraulic systems. Effective filtration prevents faults and at the same time increases the service life of the components.

For the selection of the filters see www.boschrexroth.com/filter.

Control cover for mounting a directional spool valve or directional seat valve

See page 30 ... 35

Version "WEMA" (size 16 ... 100)

Control cover for mounting a directional spool valve or directional seat valve with pilot port for switching a second valve

See page 38 ... 43

Version "WECA" (size 16 ... 100)

Control cover for mounting a directional spool valve as check valve switch

See page 44 ... 47

Version "GWA" (size 16 ... 100)

Control cover for mounting a directional spool valve or directional seat valve, with installed shuttle valve

See page 50 ... 55

Version "GWMA" (size 16 ... 80)

Control cover for mounting a directional spool valve or directional seat valve, with installed shuttle valve as check valve switch

See page 56 ... 63

Version "KWA" (size 16 ... 100)

Control cover for mounting a directional spool valve or directional seat valve, with installed shuttle valve as check valve switch

See page 64 ... 69

Notice:

size 63 (dimensions in mm)

- 1 Name plate
- 2 Ports Y and Z1 optionally as threaded connection
- 3 Plug screw M8 x 1 with type KWB
- 4 Plug screw M8 x 1 with type KWA
- 5 Shuttle valve
- 6 Directional spool valve type 4WE 10 D... (pilot control valve), separate order see page 12
- 7 Directional seat valve type M-3SEW 10... (pilot control valve), separate order see page 12
- 8 Porting pattern according to ISO 4401-03-02-0-05

Notice:

The dimensions are nominal dimensions which are subject to tolerances.

**Control covers “KWA” and “KWB” for mounting a directional spool valve or directional seat valve:
Size 80 ... 100**

01	02	03	04	05	06	07	08	09	10	11	12	13	14	15	16	17
LFA			-	7X	/								X20			1)

Size		Type	A	B	P	T	X
80	100	KWA	A**		P25	T**	X20
		KWB		B**	P25	T**	X20

△ Nozzle possible, must be specified if required

△ Standard nozzle (\varnothing in 1/10 mm) (does not appear in the type designation)

¹⁾ See “General notes on ordering codes for control cover type LFA...” page 11.

For nozzle ordering codes, see page 71.

LFA . KWA... (size 80 ... 100)

LFA . KWB... (size 80 ... 100)

Control covers "KWA" and "KWB" for mounting a directional spool valve or directional seat valve:
Size 80 ... 100 (dimensions in mm)

- 1 Name plate
- 2 Ports Y and Z1 optionally as threaded connection
- 3 Plug screw for type KWB
- 4 Plug screw for type KWA
- 5 Shuttle valve
- 6 Directional spool valve
type 4WE 10 D... (pilot control valve),
separate order see page 12

- 7 Directional seat valve type
M-3SEW 10... (pilot control valve),
separate order see page 12
- 8 Porting pattern according to
ISO 4401-05-04-0-05

Size	80	100
D1	250	300
H1	100	110
H2	19.5	27
H3	45	52.5
H4	60	70
H5	52	62
L1	55	62
L3	6.5	5
L6	6.5	2

Notice:

The dimensions are nominal dimensions which are subject to tolerances.

Intermediate cover "D19" for installation kit with greater spring installation space and piston sealing (on request)

01	02	03	04	05	06	07	08	09	10	11	12	13	14	15	16	17
LFA		D19	-	7X	/											1)

02	Size					
	16	25	32	40	50	63

¹⁾ See "General notes on ordering codes for control cover type LFA..." page 11.

 **Notice:**

Greater spring installation space (see type LC.../-004 and LC.../-146 page 72)

LFA . D19...

Mounting screws: Intermediate cover with control cover (separate order)
