## CJ2X Series

## Symbol

Double acting, Single rod, Rubber bumper

Specifications

| Bore size (mm) |  | 10 | 16 |
| :---: | :---: | :---: | :---: |
| Action |  | Double acting, Single rod |  |
| Fluid |  | Air |  |
| Proof pressure |  | 1.05 MPa |  |
| Maximum operating pressure |  | 0.7 MPa |  |
| Ambient and fluid temperature |  | Without auto switch: $-10^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$ <br> With auto switch: $-10^{\circ} \mathrm{C}$ to $60^{\circ} \mathrm{C}$ |  |
| Cushion |  | Rubber bumper (Standard equipment) |  |
| Lubrication |  | Not required (Non-lube) |  |
| Stroke length tolerance |  | ${ }_{0}^{+1.0}$ |  |
| Piston speed |  | 1 to $300 \mathrm{~mm} / \mathrm{s}$ |  |
| Allowable kinetic energy | $\varnothing 10$ | 0.035 J |  |
|  | $\varnothing 16$ | 0.090 J |  |

## Minimum Operating Pressure

| Unit: MPa |  |  |  |  |  |
| :---: | :---: | :--- | ---: | :---: | :---: |
| Bore size $(\mathrm{mm})$ | $\mathbf{1 0}$ | $\mathbf{1 6}$ |  |  |  |
| Minimum operating pressure |  | 0.06 |  |  |  |

## Standard Strokes

| Bore size $(\mathrm{mm})$ |  |
| :---: | :---: |
| $\mathbf{1 0}$ | $15,30,45,60,75,100,125,150$ |
| $\mathbf{1 6}$ | $15,30,45,60,75,100,125,150,175,200$ |

Note 1) Manufacture of intermediate strokes at 1 mm intervals is possible. (Spacers are not used.)
Note 2) Applicable strokes should be confirmed according to the usage. For details, refer to "Air Cylinders Model Selection" on front matter pages of the Best Pneumatics No. 2-1.

Mounting and Accessories/For details about accessories, refer to page 258.

|  | Mounting | Basic | Foot | Flange | Double* ${ }^{* 1}$ clevis |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Mounting nut | $\bigcirc$ | $\bigcirc$ | $\bullet$ | - |
|  | Rod end nut | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | Clevis pin | - | - | - | $\bigcirc$ |
| $\begin{aligned} & \text { 듬 } \\ & \text { 응 } \end{aligned}$ | Single knuckle joint | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | Double knuckle joint*1 | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | Double knuckle joint (With one-touch connecting pin) | $\triangle$ | $\triangle$ | $\triangle$ | $\triangle$ |
|  | Rod end cap (Flat/Round type) | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |
|  | T-bracket | - | - | - | $\bigcirc$ |

*1 A pin and retaining rings are included with double clevis and/or double knuckle joint.
*2 Stainless steel mounting brackets and accessories are also available.
Refer to page 258-1 for details.

## Ordering Example of Cylinder Assembly

## . Precautions

I Be sure to read this before handling the products.
I Refer to back page 50 for Safety Instructions and pages 3 to 12 for Actu- I
I ator and Auto Switch Precautions.

## Mounting

## SCaution

1. During installation, secure the rod cover and tighten by applying an appropriate tightening force to the retaining nut or to the rod cover body.
If the head cover is secured or the head cover is tightened, the cover could rotate, leading to the deviation.
2. Tighten the retaining screws to an appropriate tightening torque within the range given below. Apply a Loctite ${ }^{\circledR}$ (no. 242 Blue) for mounting thread.

| Bore size <br> (mm) | Proper tightening torque for mounting thread ( $\mathrm{N} \cdot \mathrm{m}$ ) <br> (Tightening torque for mounting nut) |
| :---: | :---: |
| $\mathbf{1 0}$ | 3.0 to 3.2 |
| $\mathbf{1 6}$ | 5.4 to 5.9 | appropriate pair of pliers (tool for installing a type $C$ retaining ring). Especially with $\varnothing 10$, use ultra thin pliers.

4. In the case of auto switch rail mounting type, do not remove the rail that is mounted. Because retaining screws extend into the cylinder, this could lead to an air leak.

## Weights

| Bore size (mm) |  | 10 | 16 |
| :---: | :---: | :---: | :---: |
| Basic weight (When the stroke is zero) | Basic | 22 | 46 |
|  | Axial piping | 22 | 46 |
|  | Double clevis (including clevis pin) | 24 | 54 |
|  | Head-side bossed | 23 | 48 |
| Additional weight per 15 mm of stroke |  | 4 | 7 |
| Mounting bracket weight | Single foot | 8 | 25 |
|  | Double foot | 16 | 50 |
|  | Rod flange | 5 | 13 |
|  | Head flange | 5 | 13 |
| Accessories | Single knuckle joint | 17 | 23 |
|  | Double knuckle joint (including knuckle pin) | 25 | 21 |
|  | Double knuckle joint (With one-touch connecting pin) | 26 | 22 |
|  | Rod end cap (Flat type) | 1 | 2 |
|  | Rod end cap (Round type) | 1 | 2 |
|  | T-bracket | 32 | 50 |

* Mounting nut and rod end nut are included in the basic weight. Note) Mounting nut is not included in the basic weight for the double clevis.

Calculation: Example) CJ2XL10-45Z

- Basic weight............................ 22 (ø10)
- Additional weight......................4/15 stroke
- Cylinder stroke......................... 45 stroke
- Mounting bracket weight......... 8 (Axial foot)

## CJ2X Series

## Precautions

Assembly Procedures

1. Double Clevis (With One-touch Connecting Pin) (CD-J $\square$ )

(2) Rotate the connecting pin.

(3) Assembly completed without tools.

* The above mounting instructions are for downward-facing ports. Refer to the following for upward-facing ports.

2. Double Knuckle Joint (With One-touch Connecting Pin) (IY-J■)

2 Rotate the connecting pin.

3 Assembly completed without tools.

## How to Mount the Double Clevis (With One-touch Connecting Pin)

When connecting a double clevis cylinder to a pivot bracket (T-bracket), it is recommended that the pivot bracket (T-bracket) and the cylinder be connected with the one-touch connecting pin first, before fastening the pivot bracket.
When connecting the cylinder after the pivot bracket (T-bracket) has been fastened, mount the cylinder according to the following procedure.

## . Warning

For assembling the clevis type to the pivot bracket, refer to the figure below.

1. Insert the double clevis (One-touch connecting pin) from the direction in the figure.

When port is facing upward

## $\triangle$ Warning

* Perform the mounting within the following range.

2. Push the one-touch connecting pin into the cylinder body (Double clevis) until it clicks and is firmly fastened.

* Values which include hysteresis are for guideline purposes only, they are not a guarantee (assuming approximately $\pm 30 \%$ dispersion) and may change substantially depending on the ambient environment.

## Auto Switch Mounting Brackets/Part No.

Note 1) Since the switch bracket (made from nylon) are affected in an environment where alcohol, chloroform, methylamines, hydrochloric acid or sulfuric acid is splashed over, so it cannot be used. Please contact SMC regarding other chemicals.
Note 2) Avoid the indicator LED for mounting the switch bracket. As the indicator LED is projected from the switch unit, indicator LED may be damaged if the switch bracket is fixed on the indicator LED.
Note 3) When the cylinder is shipped, the auto switch mounting bracket and the auto switch will be included.
Note 4) For the D-M9 $\square \mathrm{A}(\mathrm{V})$, order the BQ2-012S, which uses stainless steel mounting screws.

## Band Mounting Brackets Set Part No.

| Set part no. | Contents |
| :--- | :--- |
| BJ2- $\square \square \square$ | • Auto switch mounting band (a) <br> • Auto switch mounting screw (b) |

## [Stainless Steel Mounting Screw]

The following stainless steel mounting screw kit is available. Use it in accordance with the operating environment. (Since the auto switch mounting bracket is not included, order it separately.) BBA4: For D-C7/C8/H7 types
Note 5) Refer to page 1048 for details on the BBA4.
When the D-H7BA type auto switch is shipped independently, the BBA4 is attached.

[^4]Please consult with SMC regarding water resistant types with the above model numbers．
＊2 1 m type lead wire is only applicable to D－A93．
＊Lead wire length symbols： 0.5 m ．．．．．．．．Nil（Example）M9NW
＊Solid state auto switches marked with＂$\bigcirc$＂are produced upon receipt of order．

$5 \mathrm{~m} . . . . . . . Z$ Z（Example）M9NWZ
None ．．．．．．．．N（Example）H7CN
＊Do not indicate suffix＂ N ＂for no lead wire on the D－A3 $\square \mathrm{A} / \mathrm{A} 44 \mathrm{~A} / \mathrm{G} 39 \mathrm{~A} / \mathrm{K} 39 \mathrm{~A}$ models．
＊Since there are other applicable auto switches than listed above，refer to page 282 for details．
＊For details about auto switches with pre－wired connector，refer to pages 1014 and 1015.
＊The D－A9Пロ／M9 $\square \square \square$ auto switches are shipped together，（but not assembled）．（However，only the auto switch mounting brackets are assembled before shipment．）
＊The D－C7ロロ／C80ロ／H7 $\square$ auto switches are assembled before shipment．

## CM2X Series

## Symbol

Double acting, Single rod, Rubber bumper

## Standard Strokes

| Bore size <br> $(\mathrm{mm})$ | Standard stroke (mm) |
| :---: | :---: |
| $\mathbf{2 0}$ |  |
| $\mathbf{2 5}$ | $200,250,300$ |
| $\mathbf{3 2}$ |  |
| $\mathbf{4 0}$ |  |

Note 1) Manufacture of intermediate strokes in 1 mm increments is possible. (Spacers are not used.)
Note 2) Applicable strokes should be confirmed according to the usage. For details, refer to "Air Cylinders Model Selection" on front matter pages of the Best Pneumatics No. 2-1. In addition, the products that exceed the standard stroke might not be able to fulfill the specifications due to the deflection etc.

| Boss-cut/Basic | (1) | $\bigcirc$ | - | - | $\bigcirc$ | - |  |  |
| Boss-cut/Flange | (1) | - | - | - | $\bigcirc$ | - | - | - |
| Boss-cut/Trunnion | (1) Note 2) | $\bigcirc$ | - | - | - | - |  |  |

Note 1) Mounting nuts are not attached to the integrated clevis, single clevis and double clevis types.
Note 2) Trunnion nuts are mounted on the rod trunnion and head trunnion types.
Note 3) A pin and retaining rings (split pins for $\varnothing 40$ ) are included with the double clevis and double knuckle joint types.
Note 4) A pin and retaining rings are included with the clevis pivot bracket.
Note 5) Retaining rings (split pins for $\varnothing 40$ ) are included with the clevis pin.
Note 6) A pin and retaining rings are included with the pivot bracket.
Note 7) Retaining rings are included with the pivot bracket pin.

## ．Precautions

「シе sure to read this before handling the products．
I Refer to back page 50 for Safety Instructions and pages $\mathbf{3}$ to $\mathbf{1 2}$ for Actuator and Auto Switch Precautions．

## $\triangle$ Warning

1．Do not rotate the cover．
If a cover is rotated when installing a cylinder or screwing a fitting into the port，it is likely to damage the junction part with cover．

## $\triangle$ Caution

1．Not able to disassemble．
Cover and cylinder tube are connected to each other by caulking method，thus making it impossible to disassemble．Therefore， internal parts of a cylinder other than rod seal are not replaceable．
2．Use caution to the popping of a retaining ring．
When replacing rod seals and removing and mounting a retaining ring，use a proper tool（retaining ring plier：tool for installing a type C retaining ring）．Even if a proper tool is used，it is likely to inflict damage to a human body or peripheral equipment，as a retaining ring may be flown out of the tip of a plier．Be much careful with the popping of a retaining ring．Besides，be certain that a retaining ring is placed firmly into the groove of rod cover before supplying air at the time of installment．
3．Do not use an air cylinder as an air－hydro cylinder．
If it uses turbine oil in place of fluids for cylinder，it may result in oil leakage．
4．The oil stuck to the cylinder is grease．
5．The base oil of grease may seep out．
The base oil of grease in the cylinder may seep out of the tube， cover，crimped part or rod bushing depending on the operating conditions（ambient temperature $40^{\circ} \mathrm{C}$ or more，pressurized condition，low frequency operation）．

|  | Maintenance |  |  |
| :---: | :---: | :---: | :---: |
| 介 caution |  |  |  |
| 1．Replacement parts／Seal kit |  |  |  |
| Bore size （mm） | Kit no． | Con |  |
| 20 | CM2X20－PS |  |  |
| 25 | CM2X25－PS | Rod seal |  |
| 32 | CM2X32－PS | Grease pack |  |
| 40 | CM2X40－PS |  |  |

## 2．Grease pack

When maintenance requires only grease，use the following part numbers to order．
Grease pack part number：
GR－L－005（5 g）
GR－L－010（10 g）
GR－L－150（150 g）

Note 1) Since the switch bracket (made from nylon) are affected in an environment where alcohol, chloroform, methylamines, hydrochloric acid or sulfuric acid is splashed over, so it cannot be used. Please contact SMC regarding other chemicals.
Note 2) Avoid the indicator LED for mounting the switch bracket. As the indicator LED is projected from the switch unit, indicator LED may be damaged if the switch bracket is fixed on the indicator LED.
Note 3) The D-A3 $\square$ A/A44A/G39A/K39A cannot be mounted on the CDM2 $\square \mathrm{P}$ series centralized piping type.

## Band Mounting Brackets Set Part No.

| Set part no. | Contents |
| :--- | :--- |
| BM2- $\square \square \square \mathbf{A ( S )}$ <br> *S: Stainless steel screw | •Auto switch mounting band (c) <br> •Auto switch mounting screw (d) |

| BJ5-1 | •Switch bracket (Transparent/Nylon) (a) <br> • Switch holder (b) |

Other than the applicable auto switches listed in "How to Order", the following auto switches are mountable.
Refer to pages 941 to 1067 for the detailed specifications.

| Type | Model | Electrical entry | Features |
| :---: | :---: | :---: | :---: |
| Reed | D-B53/C73/C76 | Grommet (In-line) | - |
|  | D-C80 |  | Without indicator light |
| Solid state | D-H7A1/H7A2/H7B |  | - |
|  | D-H7NW/H7PW/H7BW |  | Diagnostic indication (2-color indicator) |
|  | D-G5NT |  | With timer |

* With pre-wired connector is also available for solid state auto switches. For details, refer to pages 1014 and 1015.
* Normally closed ( $\mathrm{NC}=\mathrm{b}$ contact) solid state auto switches (D-F9G/F9H) are also available. For details, refer to page 959.
* Wide range detection type, solid state auto switch (D-G5NB) is also available. For details, refer to page 1004.

## How to Order

The type which is applicable for using inside the clean room graded ISO Class 4 by making an actuator's rod section a double seal construction and discharging by relief port directly to the outside of clean room. Since the external dimensions and applicable auto switches are the same as standard type, refer to "Pneumatic Clean Series" catalog (CAT.E02-23).

* Manufacture of intermediate strokes in 1 mm increments is possible. (Spacers are not used.)

## Specifications

## $\triangle$ Precautions

## Be sure to read this before handling the products.

I Refer to back page 50 for Safety Instructions and pages $\mathbf{3}$ to 12 for Actuator and Auto Switch Precautions.
I For the precautions in clean environments, refer to "Pneumatic Clean Series" catalog (CAT.E02-23).

## Operating Precautions

## $\triangle$ Warning

1. Do not rotate the cover.

When installing a cylinder or screwing a pipe fitting into the port, the coupling portion of the cover could break if the cover rotated.

## © Caution

1. Be careful of the retaining ring to pop out.

When replacing the rod seal, be careful of the retaining ring not to pop out while removing it.

|  |
| :--- |
| $\triangle$ Caution Maintenance |

## 1. Grease pack

. When maintenance requires only grease, use the following part number to order.
Grease pack part number:
GR-X-005 (5 g)

# Low Speed Cylinder Double Acting, Single Rod CQSX Series ø12, ø16, ø20, ø25 

[^8]* Since there are other applicable auto switches than listed, refer to page 292 for details.
* For details about auto switches with pre-wired connector, refer to pages 1014 and 1015.
* Auto switches are shipped together, (but not assembled).

Note) The D-A9ロV/M9ロV/M9 W V/M9 $9 \square \mathrm{AV}$ auto switches may not be mounted on the port side depending on the cylinder stroke or fitting size for piping. Please consult with SMC separately.

## CQSX Series

## Symbol

Single rod, Without cushion

Single rod, Rubber bumper

## $\triangle$ Precautions

「 Be sure to read this before handling I the products.
I Refer to back page 50 for Safety In- I structions and pages 3 to 12 for AcItuator and Auto Switch Precautions.

## Retaining Ring Installation/Removal

## $\triangle$ Caution

1. For installation and removal, use an appropriate pair of pliers (tool for installing a type C retaining ring).
2. Even if a proper plier (tool for installing type $C$ retaining ring) is used, it is likely to inflict damage to a human body or peripheral equipment, as a retaining ring may be flown out of the tip of a plier (tool for installing a type C retaining ring). Be much careful with the popping of a retaining ring. Besides, be certain that a retaining ring is placed firmly into the groove of rod cover before supplying air at the time of installment.

## Maintenance <br> $\triangle$ Caution

1. Replacement parts/Seal kit

Order it in accordance with the bore size.

| Bore size <br> $(\mathrm{mm})$ | Kit no. |  | Contents |  |
| :---: | :--- | :--- | ---: | :---: |
| $\mathbf{1 2}$ | CQSX12-PS |  |  |  |
| $\mathbf{1 6}$ | PQSX16-PS seal: | 1 pc. |  |  |
| $\mathbf{2 0}$ | CQSX20-PS | Real: | 1 pc. |  |
| $\mathbf{2 5}$ | CQSX25-PS gasket: | Grease pack $(10 \mathrm{~g}):$ | 1 pc. |  |

## 2. Grease pack

When maintenance requires only grease, use the following part numbers to order.
Grease pack part number:
GR-L-005 (5 g)
GR-L-010 (10 g)
GR-L-150 (150 g)

Note 1) Order two foots per cylinder.
Note 2) Parts belonging to each bracket are as follows.
Foot, Compact foot, Flange: Body mounting bolt
Double clevis: Clevis pin, Type C retaining ring for shaft, Body mounting bolt

## Mounting Bolt for CQSX/Without Auto Switch

Mounting method: Mounting bolt for through-hole mounting type of the CQSXB is available as an option.
Refer to the following for ordering procedures. Order the actual number of bolts that will be used.
Example) CQ-M3X25L 4 pcs.

Note) The appropriate flat washer must be used for through-hole mounting.

| Cylinder model | C | D | Mounting bolt part n . |
| :---: | :---: | :---: | :---: |
| CQSXB12-5D | 6.5 | 25 | CQ-M3X25L |
| 10D |  | 30 | X30L |

Mounting Bolt for CDQSX/With Auto Switch

Mounting method: Mounting bolt for through-hole mounting type of the CDQSXB is available as an option.
Refer to the following for ordering procedures.
Order the actual number of bolts that will be used.
Example) CQ-M3X30L 4 pcs.

Note) The appropriate flat washer must be used for through-hole mounting.

## Accessories

For accessory bracket for the CQS series, refer to page 302, since it is commonly used with the CQ2 series.

[^9]| Cylinder model | C | D | Mounting bolt part n . |

| :---: | :---: | :---: | :---: | :---: |
|  | 12 | 16 | 20 | 25 |
| D－M9 $\square / M 9 \square V$ D－M9 $\square$ W／M9 $\square W V$ D－M9 $\square$ A／M9 $\square$ AV | 3 | 4 | 5.5 | 4.5 |
| D－A9 $\square /$ A9 $\square$ V | 6 | 7.5 | 10 | 10 |
| D－P3DWA | － | － | － | 6 |

＊Values which include hysteresis are for guideline purposes only，they are not a guarantee（assuming approximately $\pm 30 \%$ dispersion）and may change substantially depending on the ambient environment．

## ．Precautions

「ースー Bure to read this before handling the products．
I Refer to back page 50 for Safety Instructions and pages $\mathbf{3}$ to $\mathbf{1 2}$ for Actuator and Auto Switch Precautions．
－If the cylinder is used in an application in which a magnetic material is placed in close contact around the cylinder as shown in the figure on the right（including cases in which even one of the sides is in close contact）the operation of auto switches could become unstable．Therefore，please consult with SMC for this type of application．

The type which is applicable for using inside the clean room graded ISO Class 4 by making an actuator's rod section a double seal construction and discharging by relief port directly to the outside of clean room. Since the external dimensions and applicable auto switches are the same as standard type, refer to "Pneumatic Clean Series" catalog (CAT.E02-23).

- Manufacturing of intermediate stroke Intermediate strokes in 1 mm increments are available by using spacers with standard stroke cylinders. The overall length of cylinder will be the same as the standard stroke with a longer one
Example) 3 mm width spacer is installed in the standard cylinder 10-CQSXB25-50D to make the 10-CQSXB25-47D.

## $\triangle$ Precautions

「 Be sure to read this before handling the products.
I Refer to back page 50 for Safety Instructions and pages 3 to 12 for Actuator and Auto Switch Precautions.
I For the precautions in clean environments, refer to "Pneumatic Clean Series" catalog (CAT.E02-23).

## Operating Precautions

## $\triangle$ Warning

1. Do not rotate the cover.

When installing a cylinder or screwing a pipe fitting into the port, the coupling portion of the cover could break if the cover rotated.

## $\triangle$ Caution

1. Be careful of the retaining ring to pop out.

When replacing the rod seal, be careful of the retaining ring not to pop out while removing it.

|  |
| :--- |
| $\triangle$ Caution |

## 1. Grease pack

When maintenance requires only grease, use the following part number to order.
Grease pack part number:
GR-X-005 (5 g)

# Low Speed Cylinder: Standard Type Double Acting, Single Rod CQ2X Series ø32, ø40, ø50, ø63, ø80, ø100 

How to Order
Applicable Auto Switches/Refer to pages 941 to 1067 for further information on auto switches.

[^11]* Since there are other applicable auto switches than listed, refer to page 307 for details.
* For details about auto switches with pre-wired connector, refer to pages 1014 and 1015.
* When the D-A9■(V)/M9■(V)/M9■W(V)/M9■A(V) with $\varnothing 32$ to $\varnothing 50$ are mounted on a side other than the port side, order auto switch mounting brackets separately. Refer to page 306 for details.
* Auto switches are shipped together, (but not assembled).

Specifications

| Bore size (mm) | 32 | 40 | 50 | 63 | 80 | 100 |

| Type | Pneumatic (Non-lube) |  |  |  |  |  |
| Fluid | Air |  |  |  |  |  |
| Proof pressure | 1.5 MPa |  |  |  |  |  |
| Maximum operating pressure | 1.0 MPa |  |  |  |  |  |
| Ambient and fluid temperature | Without auto switch: $-10^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$ <br> With auto switch: $-10^{\circ} \mathrm{C}$ to $60^{\circ} \mathrm{C}$ (No freezing) |  |  |  |  |  |
| Cushion | None, Rubber bumper |  |  |  |  |  |
| Rod end thread | Female thread |  |  |  |  |  |
| Stroke length tolerance | ${ }_{0}^{+1.0 ~ m m ~ N o t e) ~}$ |  |  |  |  |  |
| Mounting | Through-hole |  |  |  |  |  |
| Piston speed | 0.5 to $300 \mathrm{~mm} / \mathrm{s}$ |  |  |  |  |  |

Note) Stroke length tolerance does not include the amount of bumper change.
Minimum Operating Pressure

| Unit: MPa |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Bore size $(\mathrm{mm})$ | $\mathbf{3 2}$ | $\mathbf{4 0}$ | $\mathbf{5 0}$ | $\mathbf{6 3}$ | $\mathbf{8 0}$ | $\mathbf{1 0 0}$ |  |  |
| Minimum operating pressure | 0.025 |  | 0.01 |  |  |  |  |  |

## Standard Strokes

| Bore size $(\mathrm{mm})$ | Standard stroke $(\mathrm{mm})$ |
| :---: | :--- |
| $\mathbf{3 2 , 4 0}$ | $5,10,15,20,25,30,35$, |
|  | $40,45,50,75,100$ |
| $\mathbf{5 0 , 6 3}$ | $10,15,20,25,30,35$, |
| $\mathbf{8 0 , 1 0 0}$ | $40,45,50,75,100$ |

- Manufacturing of intermediate stroke

Intermediate strokes in 1 mm increments are available by using spacers with standard stroke cylinders. But, as for $\varnothing 40$ to $\varnothing 100$ with bumper, please consult with SMC separately.
Example) 18 mm width spacer is installed in the standard cylinder CQ2XB40-75D to make the CQ2XB40-57D.

## Mounting Brackets/Part No.

| Bore size (mm) | Foot Note 1) | Compact foot | Flange | Double clevis Note 3) |
| :---: | :---: | :---: | :---: | :---: |
| $\mathbf{3 2}$ | CQ-L032 | CQ-LC032 | CQ-F032 | CQ-D032 |
| $\mathbf{4 0}$ | CQ-L040 | CQ-LC040 | CQ-F040 | CQ-D040 |
| $\mathbf{5 0}$ | CQ-L050 | CQ-LC050 | CQ-F050 | CQ-D050 |
| $\mathbf{6 3}$ | CQ-L063 | CQ-LC063 | CQ-F063 | CQ-D063 |
| $\mathbf{8 0}$ | CQ-L080 | CQ-LC080 | CQ-F080 | CQ-D080 |
| $\mathbf{1 0 0}$ | CQ-L100 | CQ-LC100 | CQ-F100 | CQ-D100 |

Note 1) Order two foots per cylinder.
Note 2) Parts belonging to each bracket are as follows.
Foot, Compact foot, Flange: Body mounting bolt, Double clevis: Clevis pin, Type C retaining ring for shaft, Body mounting bolt
Note 3) A clevis pin and retaining rings are included with the double clevis.

## Accessory

For details about the single knuckle joint, double knuckle joint, knuckle pin, and rod end nut, refer to page 302.

* Stainless steel mounting brackets and accessories are also available.

Refer to page 302 for details.
o hung body or peripheral equipment, as a retaining ring may be flown out of the tip of a plier (tool for installing a type $C$ retaining ring). Be much careful with the popping of a retaining ring. Besides, be certain that a retaining ring is placed firmly into the groove of rod cover before supplying air at the time of installment.

## Pneumatic Circuit

1. Pressure supplied to cylinder should be set affordably. When the operating pressure is low, low speed operation may not be stable depending on a load condition. Besides, the maximum speed may be restricted depending on a pneumatic circuit, or operating pressure.

## Maintenance

## $\triangle$ Caution

1. Replacement parts/Seal kit

Order it in accordance with the bore size.

| Bore size (mm) | Kit no. | Contents |  |
| :---: | :---: | :---: | :---: |
| 32 | CQ2X32-PS | Piston seal:Rod seal: | pc. |
| 40 | CQ2X40-PS |  |  |
| 50 | CQSX50-PS |  | pc. |
| 63 | CQ2X63-PS | Gasket: 1 pc.Grease pack $(10 \mathrm{~g}):$1 pc. |  |
| 80 | CQ2X80-PS |  |  |  |
| 100 | CQ2X100-PS |  |  |  |

## 2. Grease pack

When maintenance requires only grease, use the following part numbers to order.
Grease pack part number:
GR-L-005 (5 g)
GR-L-010 (10 g)
GR-L-150 (150 g)

| D-P3DWA | 6 | 6 | 7.5 | 6.5 | 6.5 | 7.5 |
| D-P4DW | - | 5 | 5 | 5 | 5 | 5.5 |

* Values which include hysteresis are for guideline purposes only, they are not a guarantee (assuming approximately $\pm 30 \%$ dispersion) and may change substantially depending on the ambient environment.
* The auto switch mounting bracket BQ2-012 is not used for ø32 or more with the D-M9 $\square(\mathrm{V}) / \mathrm{M} 9 \square \mathrm{~W}(\mathrm{~V}) / \mathrm{M} 9 \square \mathrm{~A}(\mathrm{~V}) / \mathrm{A} 9 \square(\mathrm{~V})$ types. The above values indicate the operating range when mounted with the current auto switch installation groove.

## CQ2X Series

## Auto Switch Mounting Brackets／Part No．

Note 1）For the CDQ2 $\square 32$ to 50 ，when a compact auto switch is mounted on the three sides（A，B and C above） other than the port side of bore sizes $\varnothing 32$ to $\varnothing 50$ ，the auto switch mounting brackets above are required． Order them separately from cylinders．（It is the same as when mounting compact cylinders with an auto switch mounting rail，but not with a compact auto switch installation groove for the CDQ2■63 to 100．） Example
CDQ2XB32－100DM－M9BW．．．．．． 1 unit
BQ－2．．．．．． 2 pcs．
BQ2－012．．．．． 2 pcs．
Note 2）When the cylinder is shipped，an auto switch mounting bracket and auto switch are included in the shipment．

| Auto switch model | Bore size（mm） |  |
| :---: | :---: | :---: |
|  | ø32 | $\varnothing 40$ to $\varnothing 100$ |
| D－A7■／A80 <br> D－A73C／A80C <br> D－A7 $\square$ H／A80H <br> D－A79W <br> D－F7口／J79 <br> D－F7■V <br> D－J79C <br> D－F7口W／J79W <br> D－F7口WV <br> D－F79F／F7NT |  | BQ－2 |
| D－P4DW | － | BQP1－050 |

Auto Switch Mounting Bracket Weight

| Auto switch mounting bracket part no． | Applicable cylinder bore size | Weight（g） |
| :---: | :---: | :---: |
| BQ－2 | $ø 32$ to $\varnothing 100$ | 1.5 |
| BQ6－032S | $ø 32$ to $\varnothing 100$ | 5 |
| BQP1－050 | $\varnothing 40$ to $\varnothing 100$ | 16 |

Note）When the cylinder is shipped，an auto switch mounting bracket and auto switch are included in the shipment． However，$\varnothing 40$ to $\varnothing 100$ with the D－P4DW are assembled at the time of shipment．

| Type | Model | Electrical entry | Features | Applicable bore size |
| :---: | :---: | :---: | :---: | :---: |
| Reed | D-A73 | Grommet (Perpendicular) | - | ø32 to ø100 |
|  | D-A80 |  | Without indicator light |  |
|  | D-A73H/A76H | Grommet (In-line) | - |  |
|  | D-A80H |  | Without indicator light |  |
| Solid state | D-F7NV/F7PV/F7BV | Grommet (Perpendicular) | - | ø32 to ø100 |

Note）Only 5 stroke comes with M5 x 0.8 in the case of no auto switch on ø32．

## $\triangle$ Precautions

「 Be sure to read this before handling the products．
I Refer to back page 50 for Safety Instructions and pages 3 to 12 for Actuator and Auto Switch Precautions．
I For the precautions in clean environments，refer to＂Pneumatic Clean Series＂catalog（CAT．E02－23）．

## Operating Precautions

## $\triangle$ Warning

1．Do not rotate the cover．
When installing a cylinder or screwing a pipe fitting into the port，the coupling portion of the cover could break if the cover rotated．

## $\triangle$ Caution

1．Be careful of the retaining ring to pop out．
When replacing the rod seal，be careful of the retaining ring not to pop out while removing it．

|  |
| :--- |
| $\triangle$ Caution |

## 1．Grease pack

－When maintenance requires only grease，use the following part number to order．
Grease pack part number：
GR－X－005（5 g）

## $\triangle$ Precautions

「 Be sure to read this before handling the products.
I Refer to back page 50 for Safety Instructions and pages 3 to 12 for I
I Actuator and Auto Switch Precautions.

## Mounting

## $\triangle$ Caution

1. Tightening the cylinder beyond the range of the indicated torque (shown in the table below) may affect operation. Apply a Loctite ${ }^{\circledR}$ (no. 242, Blue) to the mounting threads.
Bore size Hexagon socket Proper tightening torque

| $(\mathrm{mm})$ | head (mm) | $(\mathrm{N} \cdot \mathrm{m})$ (Cylinder body) |
| :---: | :---: | :---: |
| $\mathbf{1 0}$ | M3 | $0.54 \pm 10 \%$ |
| $\mathbf{1 6}$ | M4 | $1.23 \pm 10 \%$ |
| $\mathbf{2 0 , 2 5}$ | M5 | $2.55 \pm 10 \%$ |
| $\mathbf{3 2}$ | M6 | $4.02 \pm 10 \%$ |

## Operating Precautions

$\triangle$ Warning

1. It might not be able to control the CUX10 by meter-out at a low speed operation.

## $\triangle$ Caution

1. For the CUX10, up to $0.1 \mathrm{NL} / \mathrm{min}$ (ANR) of internal leakage is anticipated due to cylinder structure.
Maintenance

## $\triangle$ Caution

1. Replacement parts/Seal kit Order it in accordance with the bore size.

| Bore size <br> $(\mathrm{mm})$ | Kit no. |  | Contents |  |
| :---: | :--- | :--- | :--- | :---: |
| $\mathbf{1 6}$ | CUX16-PS | Piston seal: | 1 pc. |  |
| $\mathbf{2 0}$ | CUX20-PS | Rod seal: | 1 pc. |  |
| $\mathbf{2 5}$ | CUX25-PS | Gasket: | 1 pc. |  |
| $\mathbf{3 2}$ | CUX32-PS | Grease pack $(10 \mathrm{~g}):$ | 1 pc. |  |

* It is impossible to replace seals in bore size 10 mm .

## 2. Grease pack

When maintenance requires only grease, use the following part numbers to order. Grease pack part number:
GR-L-005 (5 g)
GR-L-010 (10 g)
GR-L-150 (150 g)

Note 1) Figures in the table above are used as a reference when mounting the auto switches for stroke end detection. Adjust the auto switch after confirming the operating condition in the actual setting.
Note 2) Negative figures in the table W indicate an auto switch is mounted inward from the edge of the cylinder body.
Note 3) In the case of the 5 stroke or the 10 stroke, there are times in which the auto switch will not turn OFF or 2 auto switches will turn ON simultaneously due to their movement range. Therefore, set the position approximately 1 to 4 mm outward from the values given in the table above. Then, perform an operation inspection to make sure that the auto switches operate normally (if 1 auto switch is used, make sure that it turns ON and OFF properly; if 2 auto switches are used, make sure that both auto switches turn ON).
Note 4) () in column W is the dimensions of the D-A96.

## Operating Range

| (mm) |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Auto switch model | Bore size |  |  |  |  |  |
|  | $\mathbf{1 0}$ | $\mathbf{1 6}$ | $\mathbf{2 0}$ | $\mathbf{2 5}$ | $\mathbf{3 2}$ |  |
| D-M9 $\square$, M9 $\square \mathbf{V}$ <br> D-M9 $\square \mathbf{W , ~ M 9 ~} \square \mathbf{W V}$ <br> D-M9 $\square$ A, M9 $\square$ AV | 4 | 5.5 | 7 | 7 | 7.5 |  |
| D-A9 $\square$, A9 $\square \mathbf{V}$ | 6 | 9 | 11 | 12.5 | 14 |  |

* Values which include hysteresis are for guideline purposes only, they are not a guarantee (assuming approximately $\pm 30 \%$ dispersion) and may change substantially depending on the ambient environment.

Other than the applicable auto switches listed in "How to Order", the following auto switches are mountable.

* Normally y cosed $(\mathrm{NC}=\mathrm{b}$ contact $)$ solid state auto switches $(\mathrm{D}-\mathrm{Fg} / \mathrm{F} / \mathrm{H})$ are also available. For details, refer to page 959.
I * Normally closed ( $\mathrm{NC}=\mathrm{b}$ contact) solid state auto switches ( $\mathrm{D}-\mathrm{FgG} / \mathrm{F} 9 \mathrm{H}$ ) are also available. For details, refer to page 959.

## Caution on Proximity Installation

When free mounting cylinders equipped with auto switches are used, the auto switches could activate unintentionally if the installed distance is less than the dimensions shown in the table. Therefore, make sure to provide a greater clearance. Due to unavoidable circumstances, if they must be used with less distance than the dimensions given in the table, the cylinders must be shielded. Therefore, affix a steel plate or a magnetic shielding plate (MU-S025) to the area on the cylinder that corresponds to the adjacent auto switch. (Please contact SMC for details.) Auto switches may malfunction if a shield plate is not used.

Dimensions of shielding plate (MU-S025) that is sold separately are indicated as reference.

| Bore size (mm) | Mounting pitch $\mathrm{L}(\mathrm{mm})$ |
| :---: | :---: |
| $\mathbf{1 0}$ | 30 |
| $\mathbf{1 6}$ | 33 |
| $\mathbf{2 0}$ | 40 |
| $\mathbf{2 5}$ | 46 |
| $\mathbf{3 2}$ | 56 |

Material: Ferrite stainless steel, Thickness: 0.3 mm
Since the back side is treated with adhesive, it is possible to attach to the cylinder.

# Smooth Cylinders/Low Speed Cylinders Specific Product Precautions 1 

Be sure to read this before handling the products. Refer to back page 50 for Safety Instructions and pages $\mathbf{3}$ to $\mathbf{1 2}$ for Actuator and Auto Switch Precautions.

## Recommended Pneumatic Circuit

## . Warning

## Horizontal Operation

| I | $\square$ | II |
| :--- | :--- | :--- |

Meter-in speed controller
Meter-in speed controllers can reduce lurching while controlling the speed. The two adjustment needles facilitate adjustment.

II

(1) Speed is controlled by meter-out circuit. Using concurrently the meter-in circuit can alleviate the stick-slip.*
(2) Installing a regulator with check valve at position (c) can reduce lurching during descent and operation delay during ascent.
As a guide,
adjust $\mathbf{P}_{2}$ to make $\mathbf{W}+\mathbf{P} 2 \mathbf{A}=\mathbf{P o a}$.

W: Load ( N ) Po: Operating pressure ( MPa ) $\mathrm{P}_{1}, \mathrm{P}_{2}$ : Reduced pressure (MPa) a: Rod side piston area ( $\mathrm{mm}^{2}$ ) A: Head side piston area ( $\mathrm{mm}^{2}$ )

## Warning

Since the low speed cylinder C■UX10 is subject to internal leakage due to its construction, the speed may not be fully controlled with the meterout controller (*) during low speed operation.

# Smooth Cylinders/Low Speed Cylinders Specific Product Precautions 2 

Be sure to read this before handling the products. Refer to back page 50 for Safety Instructions and pages $\mathbf{3}$ to $\mathbf{1 2}$ for Actuator and Auto Switch Precautions.

## Design

## Caution

1. Provide a construction that does not apply a lateral load to the cylinder.
Applying a lateral load to the cylinder may cause a malfunction. (Only for low speed cylinders)
2. Design the system to prevent vibration from being applied to the cylinder.
A malfunction may occur due to the vibration.
3. Avoid using a guide with obvious variations in operating resistance.
Operation may become unstable when using a guide that manifests variations in operating resistance, or when the external load changes.
4. Avoid a system structure in which the mounting orientation changes.
Operation may become unstable if the mounting orientation changes.
5. Avoid operation where the temperature fluctuates greatly. Also, when using at low temperatures, make sure that frost does not form inside the cylinder and on the piston rod.
Operation may become unstable.
6. Do not use the product at a high frequency.

Use it at 30 cpm or less as a guideline.
7. Adjust the speed in accordance with the operating environment.
When the operating environment changes, the speed adjustment will be off unless it is reset to reflect operation in the new environment.
8. For cylinders with long strokes, sliding resistance will increase due to the deflection of the piston rod and other factors. Take measures such as the installation of a guide. (Only for smooth cylinders)
9. Do not apply excessive lateral load to the piston rod. (Only for smooth cylinders) Note 1)
Note 1) Easy checking method
Minimum operating pressure after the cylinder is mounted to the equipment $(\mathrm{MPa})=$ Minimum operating pressure of cylinder ( MPa ) $+\{$ Load weight $(\mathrm{kg}) \times$ Friction coefficient of guide/Sectional area of cylinder $\left(\mathrm{mm}^{2}\right)$ \}
If smooth operation is confirmed within the above value, the load on the cylinder is the resistance of the thrust only and it can be judged as having no lateral load.

## Pneumatic Circuit

## Caution

1. The piping length between the speed controller and the cylinder port must be kept as short as possible. If the speed controller and the cylinder port are far apart, speed adjustment may be unstable.
2. Use a speed controller for low speed operation to easily adjust for low speed operation or a dual speed controller (ASD series) to prevent cylinders from popping out.
(When the speed controller for low speed operation is used, the maximum speed may be limited.)
Refer to "Recommended Pneumatic Circuit" on page 314.

## Mounting

## Caution

1. Do not apply a lateral load to the piston rod.

Applying a lateral load to the piston rod may cause a malfunction. (Only for low speed cylinders)
2. Do not apply excessive lateral load to the piston rod. (Only for smooth cylinders) Note 1 )
Note 1) Easy checking method
Minimum operating pressure after the cylinder is mounted to the equipment $(\mathrm{MPa})=$ Minimum operating pressure of cylinder (MPa) + \{Load weight (kg) x Friction coefficient of guide/Sectional area of cylinder ( $\mathrm{mm}^{2}$ ) \}
If smooth operation is confirmed within the above value, the load on the cylinder is the resistance of the thrust only and it can be judged as having no lateral load.

## $\triangle$ Caution

1. Operate without lubrication from a pneumatic system lubricator.
A malfunction may occur when lubricated in this fashion.
2. Only use the grease recommended by SMC.

The low speed cylinder and the low speed cylinder with clean room specifications use different types of grease. The use of grease other than the specified type can cause a malfunction and particulate generation.

- Order using the following part numbers when only maintenance grease is needed.
Grease

| Volume | Part no. |
| ---: | :---: |
| 5 g | GR-L-005 |
| 10 g | GR-L-010 |
| 150 g | GR-L-150 |

3. Do not wipe out the grease in the sliding part of the air cylinder.
Doing so may cause a malfunction.

## Air Supply

## $\triangle$ Caution

1. Take measures to prevent pressure fluctuation.

A malfunction may occur with the fluctuation of pressure.

[^0]:    *1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance.
    Please consult with SMC regarding water resistant types with the above model numbers.
    *2 1 m type lead wire is only applicable to D-A93.

    * Lead wire length symbols: $0.5 \mathrm{~m} . . . . . . . . . . . . . .$. . Nil (Example) M9NW

    None ................. N (Example) H7CN

    * Since there are other applicable auto switches than listed above, refer to page 264 for details.
    * Solid state auto switches marked with " $O$ " are produced upon receipt of order.
    * The D-A9■/M9■/A7■/A80■/F7■/J7■ auto switches are shipped together, but not assembled. (For band mounting, only the auto switch mounting brackets are assembled before shipment.)

[^1]:    Refer to page 258 for details of the mounting nut.

[^2]:    * A knuckle pin and retaining rings are shipped together.

[^3]:    * With pre-wired connector is also available for solid state auto switches. For details, refer to pages 1014 and 1015.
    * Normally closed ( $\mathrm{NC}=\mathrm{b}$ contact) solid state auto switches (D-F9G/F9H) are also available. For details, refer to page 959.

[^4]:    ＊1 Water resistant type auto switches can be mounted on the above models，but in such case SMC cannot guarantee water resistance．

[^5]:    Mounting
    C: Single clevis
    Pivot bracket N: Yes
    Rod end bracket V: Single knuckle joint Auto switch D-M9BW: 2 pcs.

    * Pivot bracket, single knuckle joint and auto switch are shipped together with the product, but not assembled.
    * Pivot bracket is only applicable to mounting C, $\mathrm{T}, \mathrm{U}, \mathrm{E}, \mathrm{V}$ and UZ .
    * No rod end bracket is provided for the female rod end type.

[^6]:    * When female thread is used, use a thin wrench

[^7]:    * Mounting bracket is shipped together with the product.

[^8]:    *1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance. Please consult with SMC regarding water resistant types with the above model numbers.
    *2 1 m type lead wire is only applicable to D-A93.

    * Lead wire length symbols: $0.5 \mathrm{~m} . . . . . . . . . .$. Nil (Example) M9NW
