## Air Cylinder

## CG3 Series

ø20, ø25, ø32, ø40, ø50, ø63, ø80, ø100

## Compact with a new construction! New release with full functions

 Minimized with shorter total length!Space saving; contributes to downsizing of equipment.
-

## CG3 Series

## Female rod end available as standard

Applications expanded by making it possible to select either male or female thread within the standard model.

## 2-color indicator solid state auto switch mountable

Possible to confirm whether the position is appropriate at a glance.
Increases effectiveness of adjustment time.

A green light lights up at the optimum operating range.

Optimum operating range

## Total length minimized

- The new structure has reduced the total length.
- Up to 37 mm shorter than CG1 series, making the product more compact.
- Integrated structure of head cover and tube

Comparison of the total length with CG1 series
Bore size (mm) Shortened by

* Compared with the basic type with male thread

## Series Variations

| Series | $\begin{aligned} & \text { Bore size } \\ & (\mathrm{mm}) \end{aligned}$ | Standard stroke (mm) | Action | Rod | Mounting | Built-in magnet for auto switch | Rubber bumper | Auto switch |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| CG3 | 20 | 25 to 200 | Double acting | Single rod | Basic, Foot, Flange, Clevis |  |  | D-M9 $\square$ (W), D-A90 |
|  | 25 to 63 | 25 to 300 |  |  |  |  |  |  |
|  | 80, 100 |  |  |  |  |  |  | D-G5 $\square$ (W), D-K59(W), D-B64 |

# Air Cylinder Short Type Standard: Double Acting, Single Rod CG3 Series <br> $\varnothing 20, \varnothing 25, \varnothing 32, \varnothing 40, \varnothing 50, \varnothing 63, \varnothing 80, \varnothing 100$ 

*1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance.
A water resistant type cylinder is recommended for use in an environment which requires water resistance. However, please contact SMC for water-resistant products of ø20 and ø25. *2 1 m type lead wire is only applicable to D-A93.

* Lead wire length symbols: $0.5 \mathrm{~m} \ldots \ldots . . .$. Nil (Example) M9NW
$1 \mathrm{~m} \ldots \quad \mathrm{M}$
* Solid state auto switches marked with " $\bigcirc$ " are produced upon receipt of order.
$3 \mathrm{~m} . . . . . . . . . \mathrm{L}$ (Example) M9NWL
$5 \mathrm{~m} \cdots \ldots \ldots . . \mathrm{Z}$ (Example) M9NWZ
None.......... N (Example) H7CN
* The D-G5 $\square / K 5 \square / B 5 \square / B 6 \square$ types cannot be mounted on the bore size ø40.
* Since there are other applicable auto switches than listed above, refer to page 376 for details.
* For details about auto switches with pre-wired connector, refer to pages 1648 and 1649.

## Symbol

## Rubber bumper

## Refer to pages 373 to 376 for cylinders with

 auto switches.- Auto switch proper mounting position (detection at stroke end) and its mounting height
- Minimum stroke for auto switch mounting
- Operating range
- Auto switch mounting brackets/Part no

Calculation: (Example) CDG3FN20-100 (Built-in magnet, Flange type, ø20, 100 mm stroke)

- Basic weight ............................................ 0.09 (Basic type, ø20)
- Additional weight for bracket ............... 0.08 (Flange)
- Additional weight for stroke ................. 0.05/50 mm
- Air cylinder stroke ................................. 100 mm
- Additional weight for switch magnet $\cdots . .0 .01$
$0.09+0.08+0.05 \times(100 / 50)+0.01=0.28 \mathrm{~kg}$

## Mounting Procedure

Mounting procedure for clevis
Mounting procedure for rod end nut
Follow the procedures below when mounting a pivoting bracket on the clevis type.
$\varnothing 20$ to $\varnothing 63$

$\varnothing 80, \varnothing 100$

## $\triangle$ Caution

1. Tighten clevis bracket mounting bolts with the following proper tightening torque.
ø20: $1.5 \mathrm{~N} \cdot \mathrm{~m}, \varnothing 25$ to $\varnothing 32: 2.9 \mathrm{~N} \cdot \mathrm{~m}, \varnothing 40: 4.9 \mathrm{~N} \cdot \mathrm{~m}$
$\varnothing 50$ : $11.8 \mathrm{~N} \cdot \mathrm{~m}, \varnothing 63$ to $\varnothing 80$ : $24.5 \mathrm{~N} \cdot \mathrm{~m}, \varnothing 100$ : $42.2 \mathrm{~N} \cdot \mathrm{~m}$
2. For the flange type and the foot type, mount the rod end nut so that distance $t$ (clearance) will be 1 mm or more in order to prevent interference of the nut with the bracket when the rod is retracted.
3. The rod end nut (for male thread) should be mounted so that the hexagon part is on the rod end side. Apply the wrench to the hexagon part.

## Allowable Kinetic Energy

Table (1) Max. Allowable Kinetic Energy
[J]

| Bore size $(\mathrm{mm})$ | $\mathbf{2 0}$ | $\mathbf{2 5}$ | $\mathbf{3 2}$ | $\mathbf{4 0}$ | $\mathbf{5 0}$ | $\mathbf{6 3}$ | $\mathbf{8 0}$ | $\mathbf{1 0 0}$ |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Male rod end | 0.2 | 0.29 | 0.46 | 0.84 | 1.4 | 2.38 | 4.13 | 6.93 |
| Female rod end | 0.11 | 0.18 | 0.29 | 0.52 | 0.91 | 1.54 | 2.71 | 4.54 |

Kinetic energy $E(\mathbf{J})=\left(\mathbf{m}_{1}+\mathbf{m}_{2}\right) \mathbf{V}^{2} \quad \mathbf{m}_{1}$ : Mass of cylinder movable parts kg $\mathrm{m}_{2}$ : Load mass kg $\mathbf{V}$ : Piston speed at the end $\mathrm{m} / \mathrm{s}$

Table (2) Mass of Cylinder Movable Parts:
At Each Rod End/Without Built-in Magnet/0 Stroke [g]

| Bore size (mm) | $\mathbf{2 0}$ | $\mathbf{2 5}$ | $\mathbf{3 2}$ | $\mathbf{4 0}$ | $\mathbf{5 0}$ | $\mathbf{6 3}$ | $\mathbf{8 0}$ | $\mathbf{1 0 0}$ |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Basic | 30 | 54 | 74 | 121 | 254 | 297 | 603 | 935 |
| Long male rod end (G) | 36 | 64 | 89 | 146 | 300 | 343 | 683 | 1047 |
| Female rod end (F) | 23 | 40 | 62 | 91 | 184 | 226 | 462 | 728 |

* Mass of the rod end nut is included for the basic type and the long male rod end type $(G)$.

Table (3) Additional Mass

| Bore size (mm) | $\mathbf{2 0}$ | $\mathbf{2 5}$ | $\mathbf{3 2}$ | $\mathbf{4 0}$ | $\mathbf{5 0}$ | $\mathbf{6 3}$ | $\mathbf{8 0}$ | $\mathbf{1 0 0}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Additional mass per 50 mmo o stroke | 20 | 31 | 44 | 61 | 99 | 99 | 148 | 207 |
| Switch magnet | 4 | 4 | 9 | 13 | 14 | 22 | 24 | 35 |

## Allowable Lateral Load at Rod End

* Do not apply a lateral load over the allowable range to the rod end when it is mounted horizontally.
Calculation: (Example) CDG3BN40-150
- Standard mass of movable parts: Table (2) Rod end [Basic], Bore size [40] ..... 121 g
- Additional mass: Additional mass of stroke $61 \times 150 / 50=183 \mathrm{~g}$

## Construction

## With rubber bumper

## Component Parts

| No. | Description | Material | Note |
| :---: | :--- | :---: | :---: |
| 1 | Rod cover | Aluminum alloy | Hard anodized |
| 2 | Tube cover | Aluminum alloy | Hard anodized |
| 3 | Piston | Aluminum alloy | Chromated |
| 4 | Piston rod | Carbon steel* | Hard chrome plated* |
| 5 | Bushing | Bearing alloy |  |
| 6 | Bumper A | Resin |  |
| 7 | Bumper B | Resin |  |
| 8 | Wear ring | Resin |  |
| 9 | Rod end nut | Carbon steel | Nickel plated |
| 10 | Rod seal | NBR |  |
| 11 | Piston seal | NBR |  |
| 12 | Tube gasket | NBR |  |

Note) In the case of cylinders with auto switches, magnets are installed in the piston.

* The material for $\varnothing 20$ and ø25 cylinders with auto switches is made of stainless steel.

Replacement Parts/Seal Kit

| Bore size (mm) | Kit no. | Contents |
| :---: | :---: | :---: |
| 20 | CG3N20-PS | Set of the nos.(10), (11), (12) |
| 25 | CG3N25-PS |  |
| 32 | CG3N32-PS |  |
| 40 | CG3N40-PS |  |

Note) As sizes $\varnothing 50$ and larger cannot be disassembled, the seal cannot be replaced.
Note) Refer to the following for disassembly/ replacement. Order with a part number for each type and bore size.

* The seal kit includes a grease pack ( 10 g ).

Order with the following part number when only
the grease pack is needed.
Grease pack part no.: GR-S-010 (10 g)

*1 Use a thin wrench when tightening the piston rod.
*2 Long male rod end type $(G)$ is the same rod end dimensions ( $A, A L, H$ ) as the CG1 series.
*3 When female thread is used, use a washer, etc. to prevent the contact part at the rod end from being deformed depending on the material of the work piece.

## Foot: CG3LN Bore size - Stroke <br> With rubber bumper $8 \times \mathrm{J}$

flats KA
Sectional view of the rod part

*1 The rod end nut should be mounted in the position $t$ (clearance) so that it will have a clearance of 1 mm or more
Foot in order to prevent interference of the nut with the bolt for mounting bracket when the rod is retracted.

Note 1）Set part number which includes the auto switch mounting band（BMA2－$\square \square \square A$ ）and the holder kit（BJ5－1／Switch bracket：Transparent）．
Since the switch bracket（made from nylon）are affected in an environment where alcohol，chloroform，methylamines，hydrochloric acid or sulfuric acid is splashed over，so it cannot be used．Please consult SMC regarding other chemicals．
Note 2）Set part number which includes the auto switch mounting band（BMA2－■口ロAS／Stainless steel screw）and the holder kit（BJ4－1／Switch bracket： White）．
For the D－M9 $\square \mathrm{A}(\mathrm{V})$ type auto switch，do not install the switch bracket on the indicator light．

## ［Stainless Steel Mounting Screw］

The following stainless steel mounting screw kit is available．Use it in accordance with the operating environment．
（Since the auto switch mounting bracket is not included，order it separately．）
BBA3：D－B5，B6，G5，K5 types
BBA4：D－C7，C80，H7 types
Note 3）Refer to page 1681 for details on the BBA3．
The above stainless steel screws are used when a cylinder is shipped with the D－H7BA／G5BA auto switches．
When only an auto switch is shipped independently，the BBA3 or BBA4 is attached．

* Values which include hysteresis are for guideline purposes only, they are not a guarantee (assuming approximately $\pm 30 \%$ dispersion) and may change substantially depending on the ambient environment.

## Cylinder Mounting Bracket, by Stroke/Auto Switch Mounting Surfaces

| Auto switch model | st: Stroke (mm) |  |  |
| :---: | :---: | :---: | :---: |
|  | Basic, Foot, Flange, Clevis |  |  |
|  | With 1 pc. (Rod cover side) | With 2 pcs. (Different surfaces) | With 2 pcs. (Same surface) |
|  | Port side | Port side | Port side |
| $\begin{aligned} & \text { D-M9 } \square(\mathrm{V}) \\ & \text { D-M9 } \square \mathrm{W}(\mathrm{~V}) \\ & \text { D-M9 } \square \mathbf{A}(\mathrm{V}) \\ & \text { D-A9 } \square \end{aligned}$ | 10 st or more | 15 to 44 st | 45 st or more |
| D-C7/C8 | 10 st or more | 15 to 49 st | 50 st or more |
| D-H7 $\square / \mathrm{H} 7 \square \mathrm{~W}$ D-H7BA/H7NF | 10 st or more | 15 to 59 st | 60 st or more |
| D-C73C/C80C/H7C | 10 st or more | 15 to 64 st | 65 st or more |
| $\begin{aligned} & \text { D-B5/B6/G5/K5 } \\ & \text { D-G5 } \square W / K 59 W / G 5 B A \\ & \text { D-G59F/G5NT } \end{aligned}$ | 10 st or more | 15 to 74 st | 75 st or more |
| D-B59W | 15 st or more | 20 to 74 st | 75 st or more |

Other than the applicable auto switches listed in "How to Order", the following auto switches are mountable.
Refer to pages 1575 to 1701 for detailed specifications.

| Type | Model | Electrical entry | Features | Applicable bore size |
| :---: | :---: | :---: | :---: | :---: |
| Solid state | D-H7A1, H7A2, H7B | Grommet (ln-line) | - | ø20 to ø63 |
|  | D-H7NW, H7PW, H7BW |  | Diagnostic indication (2-color indicator) |  |
|  | D-H7BA |  | Water resistant (2-color) |  |
|  | D-G5NT |  | With timer | $ø 20$ to ø100 |
| Reed | D-C73, C76 |  | - | ø20 to ø63 |
|  | D-C80 |  | Without indicator light |  |
|  | D-B53 |  | - | ø20 to ø100 |

* With pre-wired connector is also available for solid state auto switches. For details, refer to pages 1648 and 1649.
* Normally closed ( $\mathrm{NC}=\mathrm{b}$ contact) solid state auto switches (D-F9G/F9H) are also available. For details, refer to page 1593.

## $\triangle$ Warning

1. Operate the cylinder within the specified cylinder speed, kinetic energy and lateral load at the rod end. Otherwise, cylinder and seal damage may occur.
2. The allowable kinetic energy is different between the cylinders with male rod end and with female rod end due to the different thread sizes. Refer to page 368.
3. When the cylinder is used as mounted with a single side fixed or free (basic type, flange type), be careful not to apply vibration or impact to the cylinder body. A bending moment will be applied to the cylinder due to the vibration generated at the stroke end, and the cylinder may be damaged. In such a case, mount a bracket to reduce the vibration of the cylinder or use the cylinder at a piston speed low enough to prevent the cylinder from vibrating at the stroke end.
Furthermore, when the cylinder is moved or mounted horizontally and with a single side fixed, use a bracket to fix the cylinder.
4. When female rod end is used, use a washer, etc. to prevent the contact part at the rod end from being deformed depending on the material of the work piece.

## $\triangle$ Caution

1. Do not use the air cylinder as an air- hydro cylinder. This will result in oil leakage and damage the product.
2. Use a thin wrench when tightening the piston rod.
3. Check the mounting direction of the rod end nut (for male thread). Refer to Mounting Procedure on page 367 for details.
4. There are some changes in the dimensions and the specifications of this model from the current model. Please check them when replacing from the current model. Check the operating conditions and interference with workpieces before use.

## Disassembly/Replacement <br> Warning

1. Only people who have sufficient knowledge and experience are allowed to replace seals.
The person who disassembles and reassembles the cylinder is responsible for the safety of the product. Repeatedly disassembling and reassembling the product may cause wearing or deformation of the screws as well as a decline in screw tightening strength. When reassembling the product, be sure to check the cover and tubing screws for wear, deformities, or any other abnormalities. Operating the product with damaged screws may result in the cover or tubing coming off during operation, which could lead to a serious accident. Caution must be taken to avoid such incidents.

## $\triangle$ Caution

1. Do not replace the bushings.

The bushings are press-fit. To replace them, they must be replaced together with the cover assembly.
2. To replace a seal, apply grease to the new seal before installing it.
If the cylinder is put into operation without applying grease to the seal, it could cause the seal to wear significantly, leading to premature air leakage.
3. Cylinders with $\varnothing 50$ or larger bore sizes cannot be disassembled.
When disassembling cylinders with bore sizes ø20 through $\varnothing 40$, grip the double flat part of either the head cover or the rod cover with a vise and loosen the other side with a wrench or a monkey wrench, etc., and then remove the cover. When retightening, tighten approximately 2 degrees more than the original position. (Cylinders with $\varnothing 50$ or larger bore sizes are tightened with a large tightening torque and cannot be disassembled. If disassembly is required, please contact SMC.)
4. When replacing seals, take care not to hurt your hand or finger on the corners of parts.

[^0]:    * For the trunnion type, please contact SMC sales representatives.

[^1]:    * Use a thin wrench when tightening the piston rod.

[^2]:    Note 2) Minimum stroke for auto switch mounting in types other than those mentioned in Note 1
