# Dust-tight/Water-jet-proof (IP65 Equivalent/IP67 Equivalent) <br> Battery-less Absolute Encoder Type Electric Actuator/Rod Type 

## Enclosure: IP65 equivalent/IP67 equivalent

Protects the motor

## Metal connector

Prevents dust and water droplets from entering between the cable and motor cover

## Aluminum cover

## Grease supply holes

Tubing

* Order the tubing separately.

## Vent hole

Reduces internal pressure fluctuations in order to prevent dust and water droplets from entering the device

* Be sure to attach tubing.

## Mounting groove for auto switches

Water-resistant type
For checking the limit and the intermediate signal

* Order the water-resistant 2-color indicator solid state auto switch separately.

Battery-less absolute encoder compatible

## LEY-X8 Series

## LEY-X8 Series <br> Enclosure

First Digit: Degree of protection against solid foreign objects

| Degrees | Degree of protection |
| :---: | :--- |
| $\mathbf{0}$ | Not protected |
| $\mathbf{1}$ | Protected against solid foreign objects of $50 \mathrm{mmø}$ and larger |
| $\mathbf{2}$ | Protected against solid foreign objects of $12 \mathrm{~mm} \varnothing$ and larger |
| $\mathbf{3}$ | Protected against solid foreign objects of $2.5 \mathrm{~mm} \varnothing$ and larger |
| $\mathbf{4}$ | Protected against solid foreign objects of 1.0 mm and larger |
| $\mathbf{5}$ | Dust protected |
| $\mathbf{6}$ | Dust-tight |

Second Digit: Degree of protection against water

| Degrees | Degree of protection |  |
| :---: | :--- | :--- |
| $\mathbf{0}$ | Not protected | - |
| $\mathbf{1}$ | Protected against vertically falling water droplets | Dripproof <br> type 1 |
| $\mathbf{2}$ | Protected against vertically falling water droplets <br> when enclosure is tilted up to $15^{\circ}$ | Dripproof <br> type 2 |
| $\mathbf{3}$ | Protected against rainfall when enclosure is <br> tilted up to 60 | Rainproof <br> type |
| $\mathbf{4}$ | Protected against splashing water | Splashproof <br> type |
| $\mathbf{5}$ | Protected against water jets | Water-jet- <br> proof type |
| $\mathbf{6}$ | Protected against powerful water jets | Powerful water- <br> jet-proof type |
| $\mathbf{7}$ | Protected against the effects of temporary <br> immersion in water | Immersible <br> type |
| $\mathbf{8}$ | Protected against the effects of continuous <br> immersion in water | Submersible <br> type |

## Example) Degrees of protection

| Degrees of protection |  |  | Details |
| :---: | :---: | :---: | :--- |
| IP65 | Solid foreign <br> objects | Dust-tight | Dust particles are prevented from entering the device. |
|  | Entry of <br> water | Water-jet- <br> prof** | The direct application of water jets to the device from <br> any direction will not cause any damage. |
|  | Solid foreign <br> objects | Dust-tight | Dust particles are prevented from entering the device. |
|  | Entry of <br> water | Immersible*1 | The amount of water that enters the device when the <br> actuator (in the stopped state) is submersed in up to 1 m <br> of water for up to 30 mins will not cause any damage. |

*1 Be sure to take appropriate protective measures if the product is to be used in an environment where it will be constantly exposed to water or fluids other than water splash.
In particular, the product cannot be used in environments where oils, such as cutting oil or cutting fluid, are present.

Graph of Allowable Lateral Load on the Rod End (Guide)

[Stroke] $=$ [Product stroke] + [Distance from the rod end to the center of gravity of the workpiece]

Rod Displacement: $\delta$ [mm]

| Stroke | 30 | 50 | 100 | 150 | 200 | 250 | 300 | 350 | 400 | 450 | 500 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\mathbf{2 5}$ | $\pm 0.3$ | $\pm 0.4$ | $\pm 0.7$ | $\pm 0.7$ | $\pm 0.9$ | $\pm 1.1$ | $\pm 1.3$ | $\pm 1.5$ | $\pm 1.7$ | - | - |
| $\mathbf{3 2 / 4 0}$ | $\pm 0.3$ | $\pm 0.4$ | $\pm 0.7$ | $\pm 0.6$ | $\pm 0.8$ | $\pm 1.0$ | $\pm 1.1$ | $\pm 1.3$ | $\pm 1.5$ | $\pm 1.7$ | $\pm 1.8$ |

Non-rotating Accuracy of Rod

| Size | Non-rotating accuracy $\theta$ |
| :---: | :---: |
| $\mathbf{2 5}$ | $\pm 0.8^{\circ}$ |
| $\mathbf{3 2 / 4 0}$ | $\pm 0.7^{\circ}$ |

* Avoid using the electric actuator in such a way that rotational torque would be applied to the piston rod.
This may cause the deformation of the non-rotating guide, abnormal auto switch responses, play in the internal guide, or an increase in the sliding resistance.

# Dust-tight/Water-jet-proof (IP65 Equivalent/IP67 Equivalent) Electric Actuator/Rod Type LEY-X8 (Made to Order) Series LEY25/32/40 

Refer to pages 2 to 4 for model selection.

10 Controller

*1 Please consult with SMC for non-standard strokes as they are produced as special orders.
*2 The mounting bracket is shipped together with the product but does not come assembled.
*3 For the horizontal cantilever mounting of the rod flange, or ends tapped types, use the actuator within the following stroke range. - LEY25: 200 or less • LEY32/40: 100 or less

## $\triangle$ Caution

## [CE-compliant products]

EMC compliance was tested by combining the electric actuator LEY series and the controller JXC series.
The EMC depends on the configuration of the customer's control panel and the relationship with other electrical equipment and wiring. Therefore, compliance with the EMC directive cannot be certified for SMC components incorporated into the customer's equipment under actual operating conditions. As a result, it is necessary for the customer to verify compliance with the EMC directive for the machinery and equipment as a whole.
[Precautions relating to differences in controller versions]
When the JXC series is to be used in combination with the battery-less absolute encoder, use a controller that is version V3.4 or S3.4 or higher. For details, refer to the Web Catalog.
*4 Produced upon receipt of order
*5 The DIN rail is not included. It must be ordered separately.
*6 Select "Nil" for anything other than DeviceNet ${ }^{\text {TM }}$, CC-Link, or parallel input.
Select "Nil," "S," or "T" for DeviceNet ${ }^{\text {TM }}$ or CC-Link.
Select "Nil," "1," "3," or "5" for parallel input.

## The actuator and controller are sold as a package.

Confirm that the combination of the controller and actuator is correct.
<Check the following before use.>
*1 Check the actuator label for the model number. This number should match that of the controller.

## LEY25DEB-100

| 한 | Rated voltage［V］ |  |  | 24 VDC $\pm 10 \%$ |  |  |  |  |  |  |  |  |

＊1 Horizontal：The maximum value of the work load．An external guide is necessary to support the load．（Friction coefficient of guide： 0.1 or less）The actual work load and transfer speed change according to the condition of the external guide．Also，speed changes according to the work load．Check the＂Model Selection＂on page 2.
Vertical ：Speed changes according to the work load．Check the＂Model Selection＂on page 2.
The values shown in（）are the acceleration／deceleration．Set these values to be $3000\left[\mathrm{~mm} / \mathrm{s}^{2}\right]$ or less．
＊2 Pushing force accuracy is $\pm 20 \%$（F．S．）．
＊3 The pushing force values for LEY25 $\square$ E are $30 \%$ to $50 \%$ ，for LEY32 $\square E$ are $30 \%$ to $70 \%$ ，and for LEY40 $\square$ E are $35 \%$ to $65 \%$ ．
The pushing force values change according to the duty ratio and pushing speed．Check the＂Model Selection＂on page 3.
＊4 The speed and force may change depending on the cable length，load，and mounting conditions．Furthermore，if the cable length exceeds 5 m ，then it will decrease by up to $10 \%$ for each 5 m ．（At 15 m ：Reduced by up to $20 \%$ ）
＊5 The allowable speed for pushing operations．When push conveying a workpiece，operate at the vertical work load or less．
＊6 A reference value for correcting an error in reciprocal operation
＊7 Impact resistance ：No malfunction occurred when the actuator was tested with a drop tester in both an axial direction and a perpendicular direction to the lead screw．（The test was performed with the actuator in the initial state．）
Vibration resistance：No malfunction occurred in a test ranging between 45 to 2000 Hz ．The test was performed in both an axial direction and a perpendicular direction to the lead screw．（The test was performed with the actuator in the initial state．）
＊8 Cannot be used in an environment where oil such as cutting oil splashes or it is constantly exposed to water
Take appropriate protective measures．For details on enclosure，refer to the＂Enclosure＂on page 1.
＊9 The power consumption（including the controller）is for when the actuator is operating．
＊10 The standby power consumption when operating（including the controller）is for when the actuator is stopped in the set position during the operation． Except during the pushing operation
＊11 The maximum instantaneous power consumption（including the controller）is for when the actuator is operating．This value can be used for the selection of the power supply．
＊12 With lock only
＊13 For an actuator with lock，add the power consumption for the lock．
＊14 Excludes the controller body and the connector part on the controller side

# Water Resistant 2-Color Indicator Solid State Auto Switch: Direct Mounting Type D-M9NA(V)/D-M9PA(V)/D-M9BA(V) ( $\in$ RoHs 

Auto Switch Specifications

## Grommet

- Water (coolant) resistant type
- 2-wire load current is reduced ( 2.5 to 40 mA ).
- The proper operating range can be determined by the color of the light. (Red $\rightarrow$ Green $\leftarrow$ Red)
- Using flexible cable as standard spec.

## Caution

## Precautions

Fix the auto switch with the existing screw installed on the auto switch body. The auto switch may be damaged if a screw other than the one supplied is used.
Please consult with SMC if using coolant liquid other than water based solution.

## Weight

| Auto switch model |  | D-M9NA(V) | D-M9PA(V) | D-M9BA(V) |

* Refer to the Web Catalog for solid state auto switch common specifications.
* Refer to the Web Catalog for lead wire lengths.

## Dimensions

D-M9 $\square$ A

D-M9 $\square$ AV

[^0]:    | Ambient temperature | Pushing force set value [\%] | Duty ratio [\%] | Continuous pushing time [min] |
    | :--- | :--- | :--- | :--- |
    | 40 |  |  |  | | $40^{\circ} \mathrm{C}$ or less | 65 or less | 100 | No restriction |
    | :--- | :---: | :---: | :---: |

[^1]:    * Apply grease on the piston rod periodically.

[^2]:    *1 This is the range within which the rod can move when it returns to origin. Make sure workpieces mounted on the rod do not interfere with the workpieces and facilities around the rod. *2 Position after returning to origin
    *3 [ ] for when the direction of return to origin has changed
    *4 The vent hole is the port for releasing to atmosphere. Do not apply pressure to this hole.
    Attach tubing to the vent hole and place the end of the tubing so it is not exposed to dust or water.
    *5 It is recommended to take appropriate protective measures if the product is to be used in an environment where fluids other than water splash.
    In particular, the product cannot be used in environments where cutting oil, cutting fluid, etc., are present.

    * The direction of rod end width across flats ( $\square \mathrm{K})$ differs depending on the products.
