\*1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance.

Consult with SMC regarding water resistant types with the above model numbers.

\*2 1 m type lead wire is only applicable to D-A93.

\* Lead wire length symbols: 0.5 m ..... Nil (Example) M9NW

1 m ····· M (Example) M9NWM

3 m ····· L (Example) M9NWL

5 m ····· Z (Example) M9NWZ

None ..... N (Example) H7CN

\* Since there are applicable auto switches other than listed, refer to page 326 for details.

For details about auto switches with pre-wired connector, refer to pages 474 and 475.
 D-A9□, M9□, M9□W, M9□A are shipped together (but not assembled). (Only auto switch mounting brackets are assembled at the time of shipment.)

316

SMC

\* Solid state auto switches marked "O" are produced upon receipt of order. ∗ Do not indicate lead wire length symbol N (none) for types D-A3□, D-A44, D-G-39 or D-K39.

### Hydraulic Fluid Compatibility

| Hydraulic fluid                  | Compatibility  |
|----------------------------------|----------------|
| Standard mineral hydraulic fluid | Compatible     |
| W/O hydraulic fluid              | Compatible     |
| O/W hydraulic fluid              | Compatible     |
| Water/Glycol hydraulic fluid     | Not compatible |
| Phosphate hydraulic fluid        | Not compatible |

### Standard Strokes: Refer to page 325 regarding minimum strokes for auto switch mounting.

| Standard strokes (mm) |
|-----------------------|
|                       |
| 25 to 800             |
| 25 10 800             |
|                       |
|                       |

\* Orders of the standard strokes above can be supplied with a minimum lead time.

Please consult with SMC regarding the manufacture of strokes other than the above.

#### Mounting Brackets: Part Nos.

**SMC** 

| Bore size (mm) | 20       | 25       | 32       | 40       |
|----------------|----------|----------|----------|----------|
| Axial foot*    | CHM-L020 | CHM-L025 | CHM-L032 | CHM-L040 |
| Flange         | CHM-F020 | CHM-F025 | CHM-F032 | CHM-F040 |

\* When ordering the axial foot type, order 2 pcs. for each cylinder.

Theoretical output (N) = Pressure (MPa) x Piston area (mm<sup>2</sup>)

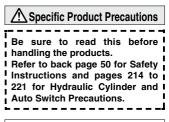

### Weight

|        |                           |      |      |      | Unit: kg |   |
|--------|---------------------------|------|------|------|----------|---|
|        | Bore size (mm)            | 20   | 25   | 32   | 40       | • |
| Ţ      | Basic type                | 0.20 | 0.29 | 0.50 | 0.82     |   |
| weight | Axial foot type           | 0.44 | 0.55 | 0.88 | 1.36     | • |
| Basic  | Flange type               | 0.29 | 0.46 | 0.69 | 1.03     | • |
| Ba     | Clevis type               | 0.18 | 0.37 | 0.64 | 0.77     | • |
| Add    | litional weight per 50 mm | 0.06 | 0.08 | 0.12 | 0.16     | ] |

 Calculation method (Example) CHML20-100 (Foot type ø20/100 mm stroke) Basic weight......0.44 kg
 Additional weight...0.06/50 mm

Cylinder stroke-----100 mm

0.44 + 0.06 x 100/50 = 0.56 kg

Air Release

### **≜**Caution

- Since CH□M series does not have an air release valve, release air from components other than the cylinder (e.g. from piping, etc.).
- 2. When operating a cylinder for the first time, be sure to release the air at low pressure. When the air release is complete, operate the cylinder at reduced pressure, then gradually increase it to the normal operating pressure. However, the piston speed at this time should be adjusted to the minimum speed.

Mounting

### **≜**Caution

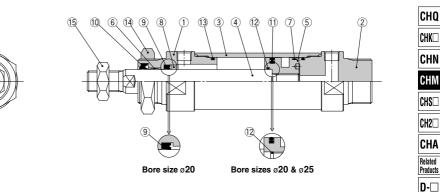

1. When mounting with bracket mounting nuts, tighten them using the tightening torques in the table below as a guide.

| Bore size<br>(mm) | Mounting<br>nut thread | Mounting nut<br>width across<br>flats (mm) | Tightening<br>torque<br>(N·m) |  |
|-------------------|------------------------|--|-------------------------------|--|
| 20                | M22 x 1.5              | 26   | 45                            |  |
| 25                | M24 x 1.5              | 32   | 60                            |  |
| 32                | M30 x 1.5              | 38   | 85                            |  |
| 40                | M33 x 1.5              | 41   | 110                           |  |

2. When mounted with one side attached and one side free (basic type, flange type) and operating at high speed, the bending moment acts on the cylinder due to oscillation at the stroke end, which may cause cylinder damage. In this type of situation, install brackets to suppress the oscillation of the cylinder body, or reduce the piston speed enough so that the cylinder body does not oscillate at the stroke end.

# Round Type Hydraulic Cylinder: 3.5 MPa $CH \Box M$ Series

### Construction

| Parts | l iet |
|-------|-------|
| Parts | LIST  |

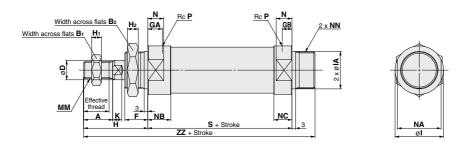

| No. | Description   | Material              | Note                         |

Note 1) Set part number which includes the auto switch mounting band (BMA2-□□□A) and the holder kit (BJ5-1/Switch bracket: Transparent).

Since the switch bracket (made from nylon) are affected in an environment where alcohol, chloroform, methylamines, hydrochloric acid or sulfuric acid is splashed over, so it cannot be used. Please consult SMC regarding other chemicals.

Note 2) Set part number which includes the auto switch mounting band ,stainless steel screw and the holder kit (BJ4-1/Switch bracket: White).

Note 3) For the D-M9□A(V) type auto switch, do not install the switch bracket on the indicator light.

#### [Stainless steel mounting screw kits]

The following stainless steel mounting screw kits are available for use depending on the operating environment. (Switch mounting bands are not included and should be ordered separately.)

BBA3: D-G5, K5, B5, B6

BBA4: D-C7, C8, H7

Note) Refer to the table below for details on BBA3, BBA4.

The above stainless steel screws are used when a cylinder is shipped with the D-G5BA auto switches.

When only an auto switch is shipped independently, the BBA3 or BBA4 is attached.

#### Stainless mounting screw kit details

### Besides the models listed in "How to Order," the following auto switches are applicable. Refer to pages 431 to 490 for detailed auto switch specifications.

| Auto switch type | Part no.           | Electrical entry      | Features                             |
|------------------|--------------------|-----------------------|--------------------------------------|
|                  | D-H7A1, H7A2, H7B  |                       | _                                    |
|                  | D-G59, G5P, K59    |                       |                                      |
|                  | D-H7NW, H7PW, H7BW |                       | Diagnostic indication                |
| Solid state      | D-G59W, G5PW, K59W | Grommet (in-line)     | (2-color indicator)                  |
|                  | D-G5BA, H7BA       | G5BA, H7BA            |                                      |
|                  | D-G5NT             | 1                     | With timer                           |
|                  | D-G59F             |                       | Diagnostic output (2-color indicator |
| Reed             | D-C73, C76, B53    | One man at (in the s) | _                                    |
| Reed             | D-C80              | Grommet (in-line)     | Without indicator light              |

(1) BJ□-1 is a set of "a" and "b".

(2) BM2-□□□A(S) is a set of "c" and "d". Band (c) is mounted so that the projected part is on the internal side (contact side with the tube). BJ4-1 (Switch bracket: Transparent) BJ5-1 (Switch bracket: Transparent)

#### How to Mount and Move the Auto Switch

#### **▲** Caution

1. Tighten the screw under the specified torque when mounting auto switch.

2. Set the auto switch mounting band perpendicularly to cylinder tube.

#### <Applicable auto switch>

#### How to Mount and Move the Auto Switch

#### Mounting the Auto Switch

- 1. Mount the auto switch mounting band around the auto switch setting position on the cylinder tube.
- Place the switch holder in the opening of the auto switch mounting band (1).
- Make the concave part of the switch bracket faced downward and set the switch bracket on the switch holder (2).
   Set the switch bracket so that both ends of the auto switch mount-

ing band enter the portion between the ribs on both side surfaces of the switch bracket.

For the D-M9 $\Box A(V)$  type auto switch, do not install the switch bracket on the indicator light.

- 4. Pass the auto switch mounting screw (M3) supplied with the auto switch mounting band from the through-hole side of the auto switch mounting band and engage it with the M3 female thread of the auto switch mounting band through the through-hole in the switch bracket.
- Tighten the auto switch mounting screw with the specified tightening torque (0.6 to 0.7 N·m).
- Insert the auto switch into the auto switch mounting groove of the switch holder (2).
- 7. After checking the detection position, tighten the set screw (M2.5) supplied with the auto switch to secure the auto switch.

#### Tightening torque for the set screw (M2.5) supplied with the auto switch (N·m)

| Auto switch model | Tightening torque |
|-------------------|-------------------|
| D-M9□(V)          |                   |
| D-M9□W(V)         | 0.05 to 0.15      |
| D-M9□A(V)         |                   |
| D-A9□(V)          | 0.1 to 0.2        |

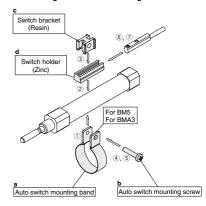

When tightening the set screw supplied with the auto switch, use a watchmaker's screw driver with a handle diameter of 5 to 6 mm.

#### Adjustment the Auto Switch Position

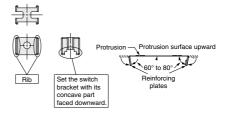

- (1) To make the fine adjustment, loosen the set screw (M2.5) supplied with the auto switch and slide the auto switch inside the auto switch mouthing groove to adjust the position.
- (2) To move the auto switch setting position largely, loosen the screw (M3) that secures the auto switch mounting band and slide the auto switch together with the switch holder on the cylinder tube to adjust the position.

Figure 1. Switch insert angle

<Switch bracket>

Note) When removing the screw connection part with the auto switch mounting screw after the auto switch mounting band has been assembled, be careful not to drop the switch bracket, switch holder, auto switch mounting screw, or auto switch mounting band.

### How to Mount and Move the Auto Switch

## **▲** Caution

1. Tighten the screw under the specified torque when mounting auto switch.

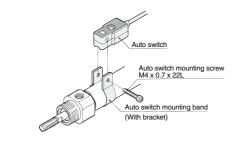

2. Set the auto switch mounting band perpendicularly to cylinder tube.

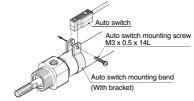

```
Mounting correctly
```

Mounting incorrectly

- Put an auto switch mounting band on the cylinder tube and set it at the auto switch mounting position.
- Put the mounting section of the auto switch between the auto switch mounting band mounting holes, then adjust the position of mounting holes of switch to those of mounting band.
- 3. Lightly thread the auto switch mounting screw through the mounting hole into the thread part of band fitting.
- 4. After reconfirming the detection position, tighten the auto switch mounting screw to secure the auto switch while properly contacting the auto switch bottom part and the cylinder tube. (The tightening torque of M4 screw should be about 1 to 1.2 N·m.)
- In the ignituating forque of M4 screw should be about 1 to 1.2 N·m.)
   Modification of the detection position should be made in the condition of 3.

- 1. Put an auto switch mounting band on the cylinder tube and set it at the auto switch mounting position.
- Put the mounting section of the auto switch between the auto switch mounting band mounting holes, then adjust the position of mounting holes of switch to those of mounting band.
- Lightly thread the auto switch mounting screw through the mounting hole into the thread part of the auto switch mounting band fitting.
- 4. After setting the whole body to the detecting position by sliding, tighten the auto switch mounting screw to secure the auto switch while properly contacting the auto switch bottom part and the cylinder tube. (Tightening torque of M3 screw should be 0.8 to 1 N-n.)
- Modification of the detection position should be made in the condition of 3.

#### How to Mount and Move the Auto Switch

#### **▲** Caution

1. Tighten the screw under the specified torque when mounting auto switch.

2. Set the auto switch mounting band perpendicularly to cylinder tube.

#### How to Mount and Move the Auto Switch

#### D-A3, D-G3/K3 type

D-A4

- 1. Loosen the auto switch mounting screws at both sides to pull down the hook.
- 2. Put an auto switch mounting band on the cylinder tube and set it at the auto switch mounting position, and then hook the band.
- 3. Screw lightly the auto switch mounting screw.
- Set the whole body to the detecting position by sliding, tighten the auto switch mounting screw to secure the auto switch. (The tightening torque should be about 2 to 3 N·m.)
- Modification of the detecting position should be made in the condition of 3.
